To Whom It May Concern

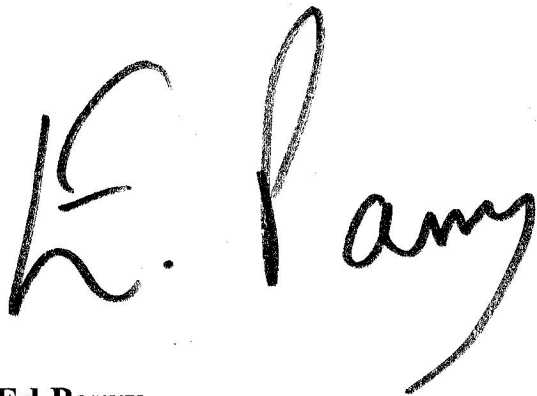

Re: **H2O Building Services**

I have employed H2O Building Services on many varied projects and emergency repair works in the London Borough of Hammersmith & Fulham during the past four or so years.

I have found the level of workmanship to be first class, the price always competitive and the response to call outs excellent.

This company is presently engaged in a number of works in the borough.

I would have no hesitation in recommending H2O Building Services for any water saving projects, surveys, or emergency repair works.
