

IMAGINE A DAY WITHOUT WATER

IMAGINE A DAY WITHOUT WATER VIDEO HIGHLIGHTS CRITICAL NEED

Every day, people drive on, under, over, and around public infrastructure.

The first two are easy to observe - the roads you drive on and power/telecommunication lines you drive under.

What you don't see is what you drive over and around - waterlines that bring clean water to your home and workplace, sewer lines that take away your liquid waste, and the facilities cleaning and treating that water.

The gap between funding water and our water infrastructure needs is

growing daily

and is currently at \$81 billion, according to a recent study by ASCE** and the Value of Water Campaign.

We can't continue to ignore this fact.

Let your local, state, and national elected officials know **you want change and support increased** water funding and necessary rate increases required to make this happen.

Do you know which one you can't live without?

Water

Garney created a video to Imagine a Day Without Water. **It's a good reminder that water is essential for everything we do in life.**

and follow the conversation on social media at **#ValueWater**

Imagine a Day Without Water

is led by the Value of Water Campaign* to raise awareness about how water is our most precious resource, yet the most undervalued.

America's water infrastructure is rapidly aging and deteriorating. Since water infrastructure is largely invisible, it's out of sight, out of mind for most people. While nature provides water, it takes pipes, pumps, equipment, and people **working 24/7 to deliver clean water to homes and businesses**, and then remove and treat wastewater so it can safely be reused or returned to the environment.
