

# SAVING WATER

SAVING WATER IS NOT ONLY A GLOBAL ISSUE WHICH WE ALL MUST TACKLE, BUT SOMETHING THAT CAN RESULT IN SIGNIFICANT MONETARY SAVINGS FOR YOUR BUSINESS.

**Are you paying too much for your water? Most companies are, often because of the amount of water that gets wasted, including from small water leaks, and because of overbilling by water companies.**

## SAVE WATER, SAVE MONEY

At H2O Building Services, we have a team of professional water consultants who are experts in the field of water

resources management<sup>1</sup>. We specialise in identifying ways for businesses to reduce water use, our consultants have experience with all the latest technologies in the industry and understand the inner workings of your water suppliers.

As a result, whenever possible, we will aim to reduce your water consumption and therefore lower your water bills.

Saving water saves you money.

Read about how we helped Barchester Healthcare<sup>2</sup> secure savings and refunds worth £350,000 through a combination of water leak detection and water bill validation.

Savings of  
**£350,000**

## HOW TO SAVE WATER

We use three main approaches to reducing water use in a business:

**Water Leak Detection<sup>3</sup> and Repair<sup>4</sup>** – a full site survey will find leaks of any size so repair work can be planned as appropriate.

such as Royal Mail, Tesco, RBS, Manchester University, ASDA, Dixon Group Retail and many more<sup>6</sup>.

**Water Auditing<sup>5</sup>** – our expert analysts have a track record of achieving outstanding savings for many companies large and small. Over the years, we have dealt with organisations

efficiency and spot any leaks straight away – potentially saving thousands of pounds.

**Water Monitoring<sup>7</sup>** – we offer to install the industry's leading remote monitoring equipment (AMR) which will track water flow hourly for 10 years. Using this, we can maximise

By taking these steps, we can often achieve savings

in excess of  
**30%**  
of your current water bill,

paying for our services many times over. Our philosophy is simple: we help you to save water and reduce your costs while you increase your profits.

Please feel free to contact us about any of these services individually or as a whole package and see how you can start saving today.
